Smart Home For Luxurious & Smart Lifestyle

Smart homes are generally associated with a high-end lifestyle, but they are much more than that. They have now evolved into an integral part of our daily lives. A Smart Home is no more a matter of just luxury, it is increasingly becoming a necessity.

Thankfully, with rapid advancements in technology, transforming a regular home into a smart home is getting easier.

“A Thousand-Mile Journey Begins With A Single Step.”

Bhavin Sodvadiya
Founder

Pradip Dakhara
Founder

Automation is all about leveraging technology to make life easier and safer. At OOB Smarthome, we see automation as a way of touching and enhancing lives in some of the most meaningful ways.

Right from our inception in 2015, we were very clear about the path we were embarking on. We deeply believe in thinking out of the box so much that we named our endeavour OOB. We were committed to creating a mark in the evolving world of the Internet of Things and wireless technologies, and we wanted to do it in our ways. Hence, instead of just procuring instruments and assembling them, we focused on developing automation products and solutions. We set up state-of-the-art R&D and manufacturing facilities to ensure the finest quality and adaptability of our offerings. We're also motivated by the goal of creating Smart Masterpieces that are reliable, convenient and safe. We ensured that they are energy efficient and simple to use even for differently-abled citizens. Every day, we consider ourselves fortunate to have been chosen to shoulder the responsibility of utilising all available resources for the greater good of society.

And we're both committed to ensuring that OOB Smarthome continues to augment newer technologies and adds a touch of elegant convenience.

VISION

To connect 10 million homes and businesses with our smart technology by 2030, making everyday life simpler and more enjoyable.

MISSION

Empowering homes and businesses with smart automation solutions that offer unparalleled convenience, security, and energy efficiency.

OUR JOURNEY

SO FAR

- 2011 In the minds of aspiring entrepreneurs, an idea emerges: to create world-class smart automation devices.
- 2013 A working prototype is created, research and development activities are initiated in Ahmedabad.
- 2015 OOB Automation R&D Unit is founded by Bhavin Sodvadiya and Pradip Dakhara. The year marks the beginning of a legacy dedicated to luxury, comfort and energy saving.
- 2016 More working prototypes are created, and a well-equipped R&D centre is established in Ahmedabad.
- 2017 OOB launches its first product for Indian markets, marked by historic moments of celebration.
- 2018 In just one year, OOB breaks records by installing smart home automation systems in 100+ homes, quite an accomplishment for a startup, isn't it?
- 2019 10,000+ smart devices made operational across the nation. A fantastic year of gaining customer trust and achieving achievement.
- 2020 Initiation of Pan-India distribution and dealer network expansion.
- 2021 The focus is on developing newer technologies and product portfolio expansion.
- 2022 Reached a milestone of having 500+ business associates across India.
- 2023 Establishment of advanced R & D center.
- 2024 Moving Forward to achieve 2024 goal

**Transforming Homes.
Enhancing Lifestyles.**

Proudly, Made in India

We are a staunch supporter of India's Make in India initiative. Taking this noble ambition a step further, we have created high-end technologies in-house, with our country's brightest minds working on them and constantly fine-tuning them to create the smartest masterpieces for luxury living.

Our smart automation devices are manufactured by highly trained people in Ahmedabad, Gujarat, at one of the most advanced state-of-the-art manufacturing facilities in the state.

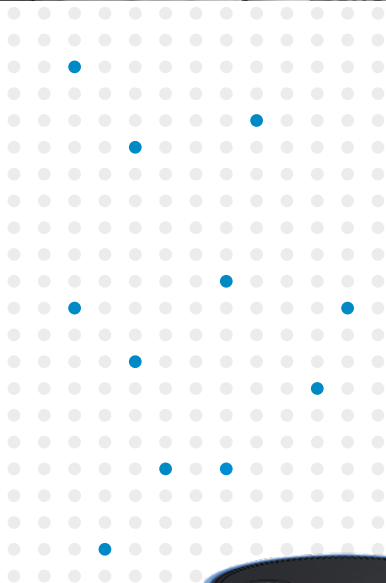

Strong, In-house R&D

OOB SMARTHOME is backed by profound Research and Development by its parent company OOB AUTOMATION.

A strong commitment to developing the finest technologies and matching state-of-the-art Research & Development facilities set us apart. OOB AUTOMATION has devoted a significant amount of time and effort to research and development that meets the highest worldwide quality standards. The R&D team consists of skilled electrical engineers, software developers, design and development experts, and true blue market analysts.

Apart from offering Smart Home solutions, the company is also developing solutions for ports, educational institutes, hotels, hospitals and engineering industries.

What makes home, a smart home?

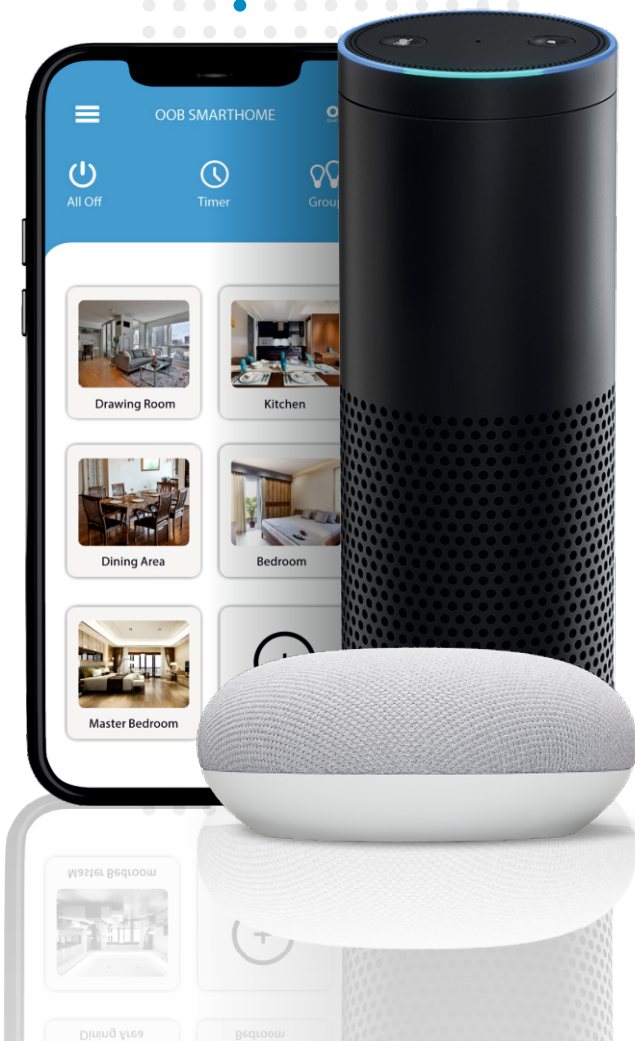

A smart home is a convenient house setting in which appliances and devices may be managed remotely using a mobile or other networked device from anywhere with an internet connection.

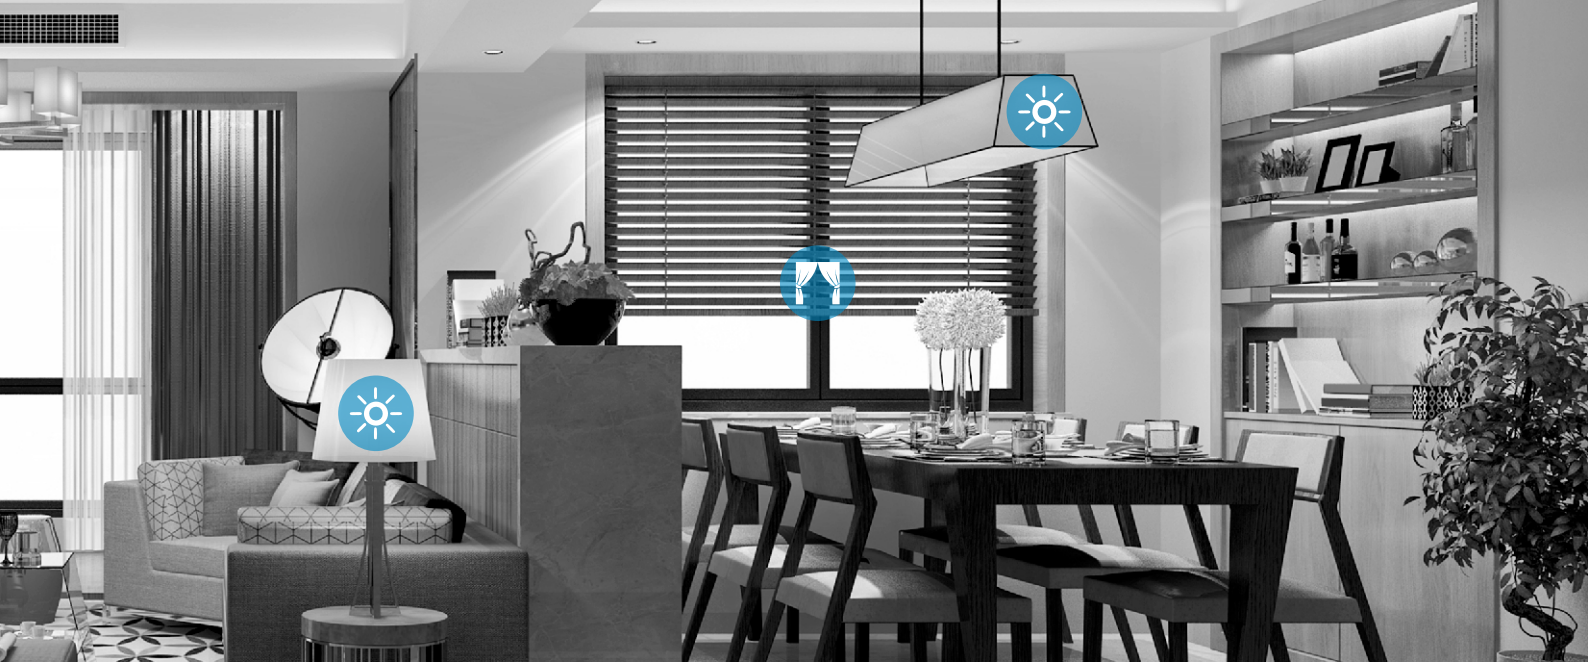

All devices of a smart home are connected via the internet, allowing the user to handle features such as home security, temperature, lighting, and a home theatre from afar, with ease, convenience and efficiency.

Electronics and connectivity are the backbones of a smart home. And all of it may be controlled from one central location—a smartphone, tablet, laptop.

Just a single home automation system can operate door locks, televisions, thermostats, home monitors, cameras, lights, and even appliances like the refrigerator. The system is installed on a mobile or other networked device, and the user can set up various parameters for changes to take effect.

OOB SMARTHOME
can help you realise all these,
with utmost ease and reliability.

Everyone deserves **A Luxurious, Safe and Smart Life**

These simple words have remained our driving force at OOB SMARTHOME

OOB SMARTHOME is a grand vision of two enterprising Indians, who initially ventured into making extraordinary smart home devices. With massive progress and rising customer trust, they are now taking giant leaps into novel segments that cater to multinational corporations, prestigious institutes, luxury estates and many more.

Apart from providing a lifestyle full of ease and comfort, we are also dedicated to energy saving and nurturing environment.

SLEEK, STYLISH, COSY & COMFY LIFE

Capacitive Touch

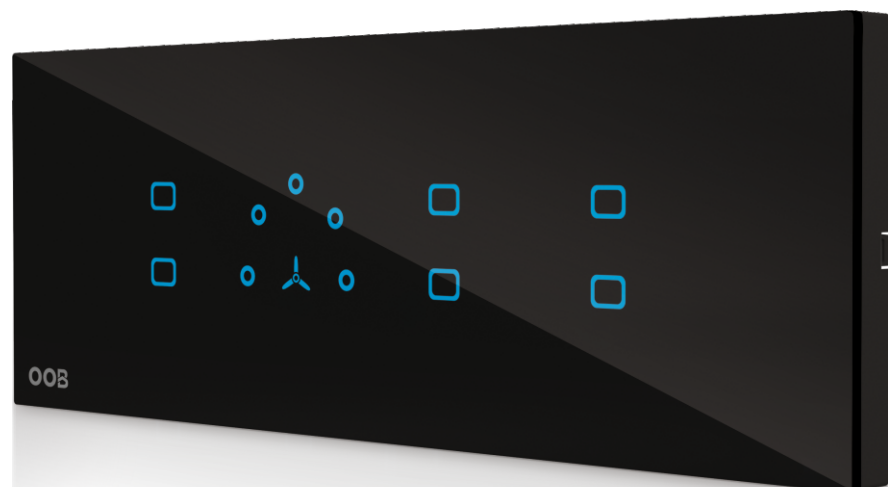

Shock Proof

Water Resistance

Energy Efficient

OOB Smarthome Advantage

Efficiency

Operate several gadgets or systems with a single touch button or mobile phone application. Control your cooling and lighting, close the blinds or keep an eye on security, all with a single click from anywhere. Use everything efficiently to save more, and enjoy more.

Comfort

Make your life easier by eliminating the need to go around the house to conduct various tasks. You may utilise smart devices to handle all household tasks via apps while sitting peacefully on the sofa or in bed.

Security

Make your home safer with well-integrated sensors and monitoring security from your smartphone.

Customization

Personalise each electronic device to your liking, as well as establish timings for certain options to be implemented.

Peace of Mind

Use your smart device to check the doors, windows, and water spill sensors, among other things. No need to go personally and check anything.

LIFESTYLE THAT IS
SMART,
SUPERIOR &
JOYFUL.**

How we transform your home and lifestyle?

At OOB SMARTHOME, we aim at transforming your lifestyle, by changing the way you interact with your appliances and devices.

We don't simply automate a couple of elements of your home to give you a sense of automation. Instead, we automate every element that improves your quality of life, helps you save energy, and save money, all without you having to think about it. Consistency, thoughtful efforts and gradual upliftment are required to change habits into a lifestyle. That is precisely the approach we use at OOB.
